# Captionet Solution LLP

We have a **stake of 40%** in Captionet Solution

We are an illustrious distributor for the following companies:

## DORMAKABA

Dormakaba is a hi-tech Security and access to building and Room Components. Our Supplier is one of the top three companies of access control and security solutions on the global market. They provide everything you need for secure access to buildings and rooms, all from a single source.

## ASTROPHYSICS

Astrophysics designs, builds, and delivers x-ray scanners for our customers' security mission around the world. Our technology detects and identifies hidden threats, helping protect critical infrastructure, transportation and trade. Our commitment to our mission is why millions around the world trust us to keep them safe always.

## DURA-LINE

Dura-Line provides pathways for connection. Conduit manufactured by Dura-Line's 20 manufacturing plants are buried underground, strung from utility pole to utility pole, and tucked away within the walls and ceilings of buildings. Dura-Line's high-density polyethylene (HDPE) pipe is used in two ways: the telecom industry and for natural gas distribution.

# Consultancy

Our strength is in our approach, we help our clients drive growth through **transformation**

# Education

Viraj Bansal is the author of '**A Handbook on Engineering Management to Meet the Global Challenges**'

The industry today demands the personnel who would snatch the lion's share of business putting their hands in its mouth. When Viraj Bansal says this, he reemphasises multi-dimensional and 360-degree analysis.

**Planning, Organizing, Leading and Controlling** are the shared building blocks of Engineering and Management education. These things have been well taken into consideration while drafting this book.

The book is designed to target the core of the amalgamation of **Engineering and Management**.

# THANK YOU!
